Terms and conditions of the License Agreement

RAV Reliable AntiVirus is a registered trademark of GeCAD Software S.R.L. (hereafter referred as "GeCAD Software"). All the products from the **RAV AntiVirus** family are offered to our clients under the terms and conditions of the License Agreement accompanying all the products of GeCAD Software.

Before installing or using The Software, please read carefully this License Agreement, because it represents a legal agreement between you and GeCAD Software for the software product you are installing, which includes the software itself and the related documentation. By installing or otherwise using the software, you accept all the terms and conditions of this agreement. If you do not accept the terms of this agreement, you do not have the rights to install or otherwise use The Software.

On the distribution CD-ROM, you may find other programs, in addition to the one you have bought. These programs are offered for evaluation only and are the object of separate terms of license. These terms are included in the **Evaluation license** section of the **License Agreement**.

RAVSENDMAIL configuration file

NAME

ravsendmail - RAV AntiVirus “filter client” for Sendmail.

SYNOPSIS

```
${BINDIR}/ravsendmail rav_data_full_path $h $f $u $i
```

DESCRIPTION

The program will be executed by Sendmail MTA as a local mailer. It is used to scan all incoming/outgoing e-mails for virus protection and/or content filtering. The program runs as a “filter client” for **ravmd**.

USAGE

rav_data_full_path

Starting with version 8.4.1, the users can change the default location of RAV directories. When doing so, **rav_data_full_path** must point to the location containing the RAV data files (**rave**, **log**, **run**, **tmp**, **ravmd.key**, etc.).

Default value for **rav_data_full_path** is **\${DATADIR}**.

The following parameters are **sendmail** internal macros:

\$h

The recipient host.

\$f

The sender’s e-mail address.

\$u

The recipient e-mail address.

\$i

Queue ID used to identify an e-mail file in the queue.

FILES

/etc/mail/sendmail.cf

NOTES

This product uses two sendmail executables running at the same time. It can introduce a significant delay in the e-mail delivery process depending on how often the queues are processed. This is why it is highly recommended to use the **RAVMilter** product instead of **ravsendmail**.

BUGS

Please mail bug reports and suggestions to: ravteam@ravantivirus.com
