

dirm3 V.21.05

1. Historical introduction

With the development of the Internet, the possibilities of music lovers have also changed. A commonly known source is Youtube and in addition there are a number of Internet radios.

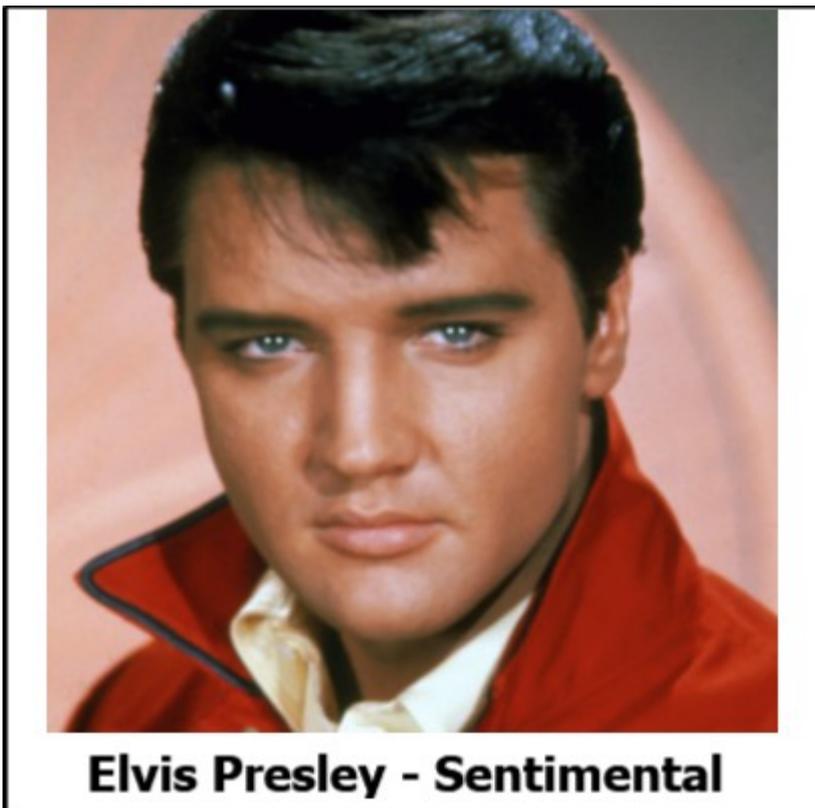

There it seems that a station or channel such as Frank Sinatra broadcasts his songs all day.

These are broadcast in .mp3 format and there are programs that can seamlessly store everything on your computer.

I choose certain songs and create my own music CD for a regular player. It is elegant to put a photo of the singer and a description on paper in a plastic package.

2. What the result looks like

You can find photos of the singer on the Internet and create and then print in another program what will be inserted on the front of the CD cover.

On the back of the CD cover, such a program can create this :

Elvis Presley - Sentimental

Elvis Presley - Sentimental

Elvis Presley - Sentimental

- 01 Sentimental Me
- 02 Treat Me Like a Fool
- 03 Love Me Tender
- 04 I Can't Help Falling In Love With You
- 05 I Want You, I Need You, I Love You
- 06 Are you lonesome tonight
- 07 The first time ever i saw your face
- 08 You Were Always On My Mind
- 09 Young And Beautiful
- 10 And I Love You So
- 11 If I Can Dream
- 12 In The Ghetto
- 13 Suspicious Minds
- 14 Blue Spanish Eyes
- 15 It's Now Or Never
- 16 Dixie & Battle Hymn of the Republic
- 17 Hawaiian Sweetheart
- 18 Funny How Time Slips Away
- 19 You'll Never Walk Alone
- 20 Something in the Way She Moves
- 21 The Wonder Of You

The program that burns .mp3 files on a CD uses the numbering of the files by which I determined the order of the tracks on the created CD.

In my folder from where I burned the CD, it looks like this :

- Názov / Prípona
- ↑..
 -  01 Sentimental Me.mp3
 -  02 Treat Me Like a Fool.mp3
 -  03 Love Me Tender.mp3
 -  04 I Can't Help Falling In Love With You.mp3
 -  05 I Want You, I Need You, I Love You.mp3
 -  06 Are you lonesome tonight.mp3
 -  07 The first time ever i saw your face.mp3
 -  08 You Were Always On My Mind.mp3
 -  09 Young And Beautiful.mp3
 -  10 And I Love You So.mp3
 -  11 If I Can Dream.mp3
 -  12 In The Ghetto.mp3
 -  13 Suspicious Minds.mp3
 -  14 Blue Spanish Eyes.mp3
 -  15 It's Now Or Never.mp3
 -  16 Dixie & Battle Hymn of the Republic.mp3
 -  17 Hawaiian Sweetheart.mp3
 -  18 Funny How Time Slips Away.mp3
 -  19 You'll Never Walk Alone.mp3
 -  20 Something in the Way She Moves.mp3
 -  21 The Wonder Of You.mp3

This is how Altap Salamander shows me, but I need to put it in a program that makes my back paper insert as text. Well, I certainly won't do it manually.

3. How the program works

Use the DIR command in the command line to create the required list. The command line is something unknown and dangerous to ordinary users. I used it for years and deleted the .mp3 extension and others in the text file.

It can do the **dirm3.exe** program in a second. Copy my program to the folder where you have the .mp3 files that you want to burn or that you have already burned. Then click on the program and a new file **dirm3.txt** will appear in the folder and there is what I did manually before and what I need on the paper insert on the back of the CD cover.

```
dirm3.txt - Poznámkový blok
Súbor Úpravy Formát Zobrazit Pomocník
01 Sentimental Me
02 Treat Me Like a Fool
03 Love Me Tender
04 I Can't Help Falling In Love With You
05 I Want You, I Need You, I Love You
06 Are you lonesome tonight
07 The first time ever i saw your face
08 You Were Always On My Mind
09 Young And Beautiful
10 And I Love You So
11 If I Can Dream
12 In The Ghetto
13 Suspicious Minds
14 Blue Spanish Eyes
15 It's Now Or Never
16 Dixie & Battle Hymn of the Republic
17 Hawaiian Sweetheart
18 Funny How Time Slips Away
19 You'll Never Walk Alone
20 Something in the Way She Moves
21 The Wonder Of You
```

Now all you have to do is use the regular display in open Notepad **CTRL-A** and **CTRL-C**.

In the program that makes you an insert on the back of the CD cover, **CTRL-V**. And it is done ...

9. Conclusion

The program is FREEWARE. However, the author reserves the right to decide where the program will be stored for download. If you intend to save the download program on another server, please inform the author.

The current version of dirmp3.exe has the following features:

Length 2 048 Bytes

Date 17.05.2021

Time 10:50:06
